I spoke to Gary Pearson a few minutes ago, and he confirmed that DEP did want us to do this. (I could go back in time and figure where this took a dead end, as it went up with the Old Bridge Waterfront Park (a/k/a North Jetty portion of RSB site), which was rejected by FEMA.

Also, see the discussion below regarding potential COE involvement. I'll check with them on this.

ALCON:

I just spoke with Rich KOZUB (732-558-1053) the requestor for Alvin Williams PK shoreline stabilization and control of the containment cap. He informed me that USACE already has this mission and is working it. Both Rich and I are unsure of how it got directly to USACE. I am waiting for the USACE POC information from Rich and I will coordinate with NJOEM regarding the adjustment in status on resource request # 124351-194-111512.

Yes. One clarification though...

Old Bridge Waterfront Park would have to be done under the cost share mission assignment (EPA-04), as it is not technical assistance, as requested. It is the same type of work as in the original RBS ARF, that FEMA needed to go under EPA-04.

Please proceed with moving the attached ARF, and we will make sure the language and scope for the western jetty portion of RBS (Old Bridge Waterfront Park) is worked out properly. Note: This is the same as I originally sent yesterday.

All...I spoke with joe rotola....in the referenced document below....we will not move on the stabilization of Alvin Williams park in seawarren....joe was unclear on the source of that request.....we will sign the arf for the work at old bridge waterfront park (raritan slag superfund site).....and pls reference that in the arf so we all know they are one in the same....thanks

Joe...thanks for clarifying...bvf

Bob -

I am pretty certain that both of these are in addition to the statement of

work for repairs at the Raritan Bay Slag (RBS) superfund site. The emergency repairs would be assigned under mission assignment EPA-04, which has the state cost share.

The two requests identified below are for technical assistance - which would put them under mission assignment EPA-03, which has no state cost share.

What I am uncertain about, is how the Old Bridge waterfront request relates to RBS, because that may be the part of the RBS site.

Requesting Joe Rotola or Dan Harkay to clarify.

Carl,

Not sure if that new SOW will change anything, so I copied BVF on this e-mail.

BREAK BREAK

Naomi just handed me 2 resource requests for DEP or EPA technical assistance:

1. (124351-194-111512) regarding the stabilization of shoreline at Alvin Williams Park, Seawaren, Woodbridge Twp to control erosion of containment cap over contaminated soils. Shoreline damage due to storm.
2. (131219-292-111512) regarding determining the extent of contamination from predetermined lead disposal area along shoreline at Old Bridge Waterfront Park. Shoreline has been compromised due to Sandy.

Andy -

Please do NOT print and proceed.

There is a revised document SOW.

I'll be getting it shortly and resending to you.

Please don't proceed with this one!

Thanks,
Carl
